Alternate Chromatic Fingering Exercises for Clarinet

by Kyle Coughlin www.SkyLeapMusic.com

II. The Side F Sharp Fingering

The side F sharp fingering involves pressing the bottom two side keys while fingering the note F, as shown in the photo to the left. It helps us avoid "flip-flopping" from F to F sharp and it is very useful in fast chromatic passages. Use the side fingering for *every* F sharp in these exercises. Doing so will help you get used to that fingering. Always practice these exercises with a metronome. Start at a slow tempo and gradually speed up. Make sure to use the side of the first finger of your right hand, and press only the bottom two keys with that finger.
